

Jhonantans Rocha

Software Engineer

About me

My name is Jhonantans Moraes Rocha, I have been working as a Fullstack Developer since 2016 and as Team Lead since 2020. I've been implementing creative and efficient solutions on Node and AWS for 5 years now, and there's still a lot to learn on a daily basis. I've also been working on personal projects with Python and Rust, two fascinating languages that interest me a lot.

Experience

Team Lead

- [BairesDev](#)
- *Aug 2020 – Present*

As a leader I am responsible for helping the team's performance by managing tasks planning and assignments as well as ensuring code cohesion and efficiency.

Software Engineer

- [BairesDev](#)
- *Dec 2018 – Present*

As a core member of the services team I have been working on the development of solutions to the client. My major focus is to support and evolve a Node environment completely powered by AWS. Part of the structure runs as monolith and part as microservices, using Lambdas, SNS and SQS. It is also part of the work to develop some React tools for internal usage.

- Back-End: Node (Sails.js, Express)
- Operation: Amazon AWS (EC2, S3, Lambda, SNS, SQS, Elasticache, RDS)
- Front-End: React

Systems Analyst

- [Metrópolis Mídia e Comunicação](#)
- *Feb 2018 - Nov 2018*

Development and maintenance of a news communication systems. Major concerns were high availability, consistent quality and speed to final consumer.

- Front-End: Bootstrap, Ionic 2, Angular 4, Vue.js, Pug, Stylus
- Back-End: Wordpress, PHP and MySQL
- Operation: Amazon AWS (EC2, S3, Lambda, RDS)

Full Stack Developer

- [Moringa Digital](#)
- *Feb 2016 - Jan 2018*

Acting in the development of hybrid applications for Android and iOS, implementation of web systems and creation and maintenance of websites and APIs.

- Back-End: ASP, Node.js and MySQL
- Front-End: HTML5/Javascript
- Hybrid Application Tools: Intel XDK, Cordova
- Frameworks: Angular 1 & 2, Ionic 1 & 2

Member (Academic Team) at Robot Soccer Team

- *UnBeatables: UnB humanoid robot soccer team*
- *Sep 2014 – Aug 2016*

I was responsible for the network area, handling communication between robot-to-robot and robot-to-computer. I also worked in the area of movement and locomotion, expanding the set of gestures and actions of the robot player. Finally, I developed the structure of the behavior state machine, implementing the reaction to events autonomously and elaborating new roles for the player.

Technologies used:

- NAO Robot
- C++
- Python
- Communication Networks (UDP/TCP)
- Linux
- State Machines

Prizes:

- World Champion, Robocup 2015, Drop-In Only category
- World Champion, Robocup 2016, Drop-In Only category
- Latin American Champion, LARC/CBR 2015, Standard Platform League
- Latin American Champion, LARC/CBR 2016, Standard Platform League

Researcher (Academic Research)

- *University of Brasilia (UnB)*
- Jan 2014 - Dec 2016

Development and application of Fuzzy controllers, based on the Takagi-Sugeno method (TS), to an industrial-level plant controlled by a Rockwell CLP.

Technologies used:

- Fuzzy Logic
- PI Controller
- PLC Programming: Ladder, Structured Text, Function Blocks
- Matlab

Education

Mechatronics, Robotics and Control and Automation Engineering

- *University of Brasilia (UnB)*
- Graduation 2011 – 2016

The course brings together knowledge in Mechanical, Electrical, Electronics and Computer Science aiming at the development of control and automation solutions for industrial and non-industrial environments. The points specially studied are:

- Control design and implementation
- PLC Programming
- Robotics
- Programming
- Mechanical Engineering
- Electrical Engineering
- Electronics

Skills & Proficiency

- Node.js (Sails.js, Express) => **5 Years**
- Javascript (ES5, ES6) => **5 Years**
- AWS (EC2, S3, SQS, SNS, Lambda) => **5 Years**
- Python (System Programming) => **3 Years**
- C/C++ (System Programming) => **3 Years**
- Angular & Ionic & Hybrid Mobile Apps (Cordova) => **3 Years**
- HTML5 & CSS => **3 Years**
- PHP & Wordpress => **1 Year**
- .NET & ASP & VBA => **2 Years**
- PLC: Ladder, Structured Text, Function Blocks => **1 Year**
- RUST: **Learning**

Languages

- Portuguese: Native
- English: Fluent
- Spanish: Intermediate

Interests

- Linux
- Open-Source Projects
- Machine Learning
- Algorithmic Trading
